To create an ecosystem of web apps that reduces time to delivery, and elevates the quality of linguistic services

The image displays four distinct web application interfaces arranged in a grid, connected by large, light-gray curved arrows forming a circular flow.

- Top Right:** A screenshot of the Plus'n'Go Translation service. It shows a 'Translation' tab selected, with sub-options for Languages, Style, Content, and Options. A text input field contains placeholder Latin text. To the right is an 'Order Summary' table detailing the job: 11 content pieces, 6 destination languages, Standard expertise, Informal - Blog style, 2nd check, Priority Order checked, estimated price per word \$0.23, estimated delivery 6 hours, and a total of \$78.27. At the bottom are 'PLACE ORDER' and 'Request a printable quote' buttons.
- Bottom Right:** A screenshot of the smartidiom JOBS website. It features a banner with the text "Be our everyday Hero" and "Join us in some of the most exciting barrier-breaking linguistic services coming from all over the World. No, we thank you!" Below the banner are sections for "Featured jobs" showing three open positions: "Digital Copywriter" (urgent), "Translator Portuguese — Danish" (new), and "Translator English (UK and US) — Dutch (Belgium)" (new). Each job listing includes a "View details →" button.
- Bottom Left:** A screenshot of a supplier management dashboard. It shows a timeline with a "TIMECARD" section showing work logs for two breaks. Below it are sections for "Tasks" (with notifications about deadlines and unfinished tasks) and "Invoices" (with notifications about invalid invoices and paid invoices). A "CALENDAR FOR OCTOBER 2018" is also present at the bottom.
- Top Left:** A screenshot of a translation or localization tool. It has tabs for Languages, Style, Content, and Options. The 'Content' tab is active, showing a text area with placeholder Latin text. Below the text area are buttons for '+ ADD TEXT' and '+ OR UPLOAD FILE'. To the right is a 'legislation.pdf' file preview. On the far right is an 'Order Summary' table, which is identical to the one in the top-right screenshot.

# GUIDE TRAVELERS

The TUI Travel website for Madrid features a large banner image of the Madrid skyline at sunset, focusing on the Metrópolis building. Below the banner, a headline reads: "Clásica, acogedora, fiestera y con una agenda cultural rebosante, Madrid es la capital europea que tiene planes para las 24 horas del día." A search form titled "Find your perfect stay:" allows users to input "Madrid" for the destination, choose travel dates from "28/10 - 29/10", specify "2 guests", and click a red "Search →" button. To the right of the search form is a map of Madrid with various neighborhoods labeled, such as Chamberí, Argüelles, Vallehermoso, Salamanca, Goya, and Retiro.

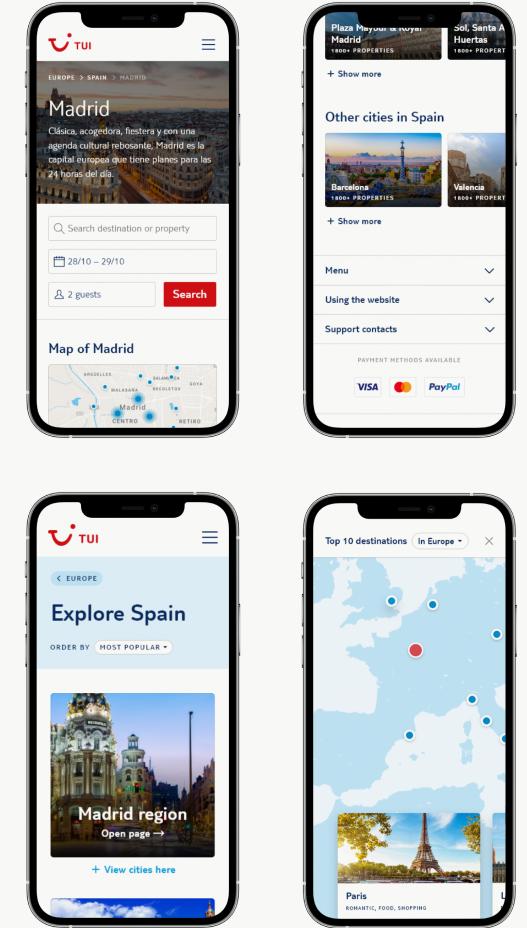

## Sobre Madrid

### Cultura, ocio y diversión 24/7

Para descubrir el Madrid más típico hay que pasear por la abarrotada Puerta del Sol, la Plaza Mayor y sus cuatro siglos de historia, el Palacio Real, la Catedral de La Almudena y el Teatro Real. El atardecer es el mejor momento para visitar el templo de Debod y al anochecer espera Gran Vía, la avenida más emblemática de la ciudad, que se llena de luces y música.

La parte más cultural de Madrid la conforma el denominado Paseo del Arte, que en poco más de un kilómetro concentra el Museo del Prado, el Reina Sofía y el Thyssen-Bornemisza. También merece la pena llegar hasta el Circulo de Bellas Artes para contemplar desde su azotea las mejores vistas de la ciudad.

## Map of Madrid

The TUI Travel mobile and tablet interfaces are shown side-by-side. The top row displays the Madrid destination page on a tablet, showing a map of Madrid, a search bar, and payment method options (VISA, MasterCard, PayPal). The bottom row shows a smartphone displaying the "Explore Spain" section with a map of Europe highlighting Madrid, and a tablet showing a detailed view of the Madrid region.

# TAGUS DESIGN SYSTEM

The screenshot shows a web-based design system interface for TAGUS. On the left, a sidebar lists 'ATOMS' and 'COMPONENTS' categories, with 'Business Pickers' selected under 'COMPONENTS'. The main content area is titled 'Business Pickers' and contains a detailed description of the component, mentioning it's a 'popup style component that displays advanced functionality on specific business inputs, like guests information, flight passengers, amounts of tickets, and others.' Below this is a section titled 'Guests Picker' with a sub-description: 'This type of picker is designed for the accommodation business model. This component allows the user to select the total amount of guests that are going to figure in the reservation, and shape the price.' A large callout box on the right provides a visual representation of the 'Guests Picker' component, showing two numeric stepper controls: one for 'Adults' (set to 2) and one for 'Children' (set to 2). Each stepper has a dropdown menu showing the current value (e.g., 'Adults: 2 adults, 2 children'). At the bottom of the callout box, there is a note: 'Consider the following artboard with specifications for the development of the Guests Picker for desktop and tablet types of devices.'
